

ATTENTION

Before starting erection.

Be sure you have received all of the building materials you ordered by checking the packages received with the Bill of Material Included with your shipment.

Immediately report any shortages, overages or damage.

The Bill of Material will be marked to show which bundle contains which parts.

Take some time to read through your Erection Drawing Pack. Try to visualize how the building will go together and what the finished product will look like. If you have any questions, now is the time to contact the Customer Service Department. Remember "measure twice - cut once".

Check the building foundation to be sure it is within the square and level tolerances. Unless any foundation error is corrected before you start erecting the building, it's going to cost you time and money. Maximum tolerances that should be accepted are:

Width and length $\pm \frac{1}{8}$ " in 12'-0"
 $\pm \frac{1}{4}$ " overall

Out of square diagonally $\pm \frac{1}{2}$ "

Out of level $\pm \frac{1}{8}$ " in 20'-0"
 $\pm \frac{1}{4}$ " overall
